

Our busy client requires an experienced processor in the field of plastic injection to be responsible for the setting, programming and processing of a plastic injection machine.

Responsibilities will include:

- Day to day programming and operation of machinery
- Restocking materials
- Quality control
- Monitoring goods in and goods out
- Packing/unpacking

Experience in plastic injection moulding is essential. Safety boots are required for this working environment.

Hours of work are generally 8:00am until 4.30pm Monday to Friday.
